Education

Mapúa Malayan Colleges Laguna Bachelor of Science in Computer Science Thesis: Cluster-Based Predictive Modeling of Type 2 Diabetes Risk Using Blood Biomarkers Honors: Dean's List (2 nd & 3 rd Term, 2025)	Cabuyao City, PH 2021 – 2026
Lyceum of the Philippines University Laguna STEM Strand With Honors (2 nd Term, 2020)	Calamba City, PH 2018 – 2020

Experience

Denso Ten Solutions Philippines Corporation Internship	Laguna, PH May 2026 – September 2026 (480 hours)
- Built MKIP, a full-stack RAG chatbot platform using React, TypeScript, MUI, FastAPI, PostgreSQL, ChromaDB, LangChain, and Groq API - Built an AI-powered training assistant using Python, LangChain, ChromaDB, Groq API, and Streamlit	
SCHR Glass Marketing Freelance Developer/Marketing Support	Sta. Cruz, PH 2021-2026
- Migrated a manual Excel-based payroll system into a full web-based payroll application - Produced graphic designs and social media content to strengthen marketing and brand visibility	
Torres Technology Center Corporation Work Immersion Trainee	Calamba City, PH June 2019
Gained hands-on exposure to production workflows and C++ programming through company workshops and technical training	

Projects

AI-Powered Manufacturing Knowledge & Intelligence System (MKIP)
- Full-stack development of Phase 1 and Phase 2, from architecture to deployment - Tech Stack: React, Typescript, MUI, FastAPI, PostgreSQL, ChromaDB, LangChain, and Groq API
AI – Powered Training, Learning & Assistance System (ATLAS)
- Full-stack development of an AI-powered chatbot for employee training and support - Tech stack: Streamlit, Python, Groq API, LangChain, and ChromaDB
DIANA: ML-Based Type 2 Diabetes Risk Clustering Using Blood Biomarkers
- Developed the dashboard module, conducted testing, and authored technical documentation - Tech Stack: Go, React, Flask, and PostgreSQL
Palayon: Mobile App for Rice Disease Prediction Using Machine Learning
- Full-stack development of a mobile app for detecting rice plant diseases via image recognition - Tech Stack: Kotlin, TensorFlow Lite, Json, and Google Teachable Machine

Technical Skills

Programming Languages: Python, C++, C#, PHP, Kotlin, Typescript
Web Development: HTML, CSS, React, FastAPI, Streamlit
Database Management: MySQL, MS Access, PostgreSQL
Software & Tools: Microsoft Office, Github, Visual Studio, Android Studio, Figma, Power Automate
Multimedia & Design: Adobe Photoshop, Adobe Lightroom, Adobe Premiere Pro, Canva, Filmora

Certifications

IBM AI Developer Professional Certificate – Couseira/IBM	2026
Job Ready: Employability Skills – Wadhwani Foundation	2026
Comptia Tech+ - CompTIA	2025
Google Cloud Computing Foundations – Google Cloud	2024
